

Enfrosun
Energy From Sun

Enfrosun Power Private Limited
Welcomes to Corporate Presentation

Vision

Let us shift our focus from centuries old practices when we exploited the conventional energy sources in whimsical way. Let us build a new 'Green' India through harnessing abundant solar power to achieve Energy security for the country through environment-friendly methods and technics.

Mission

To become pathfinder in developing & deploying new technologies. To be in the forefront in development of large scale solar installations, solar roof tops, solar parks and to promote and commercialise the use of solar energy to the furthest corner of the country for the poorest of the poor in most environment friendly manner.

Our Strength & Capabilities

- *We are a team of over 30 engineers and having more than 300 workmen at our multiple project sites.*
- *Experience of over 25 MW solar power projects across India.*
- *Executing over 1000 KW rooftop Projects in NCR, Rajasthan and Punjab.*

Enfrosun
Energy From Sun

Rajasthan Site – 10 MW Plant

Scope of Work : BOS

Enfrosun
Energy From Sun
