What We do

Excellence is our Passion, Expertise and Commitment

Design

Execute

Commission

Operate

All these images are from our office and project site

- ❑ Using only the highest quality components, including Tier 1 modules backed by robust linear degradation warranties, and top-tier inverter and other components supplies.
- ❑ System design to match the location requirements, including wind speed, corrosion risks, maintenance requirements and other factors
- ❑ In-house engineering, procurement, projects and O&M teams which work together closely on each project design
- ❑ Rigorous shadow analysis to optimize the plant design given shadows from nearby objects throughout the year
